

Introducing the new...

FSC Terpene Key

Terpenes are naturally occurring compounds found in the cannabis plant strains. They are responsible for the way a strain smells, tastes, and the effects produced. Each strain that is currently active at First State Compassion, is featured below, with the three most prominent terpenes found in their chemistry makeup, with a blue "X".

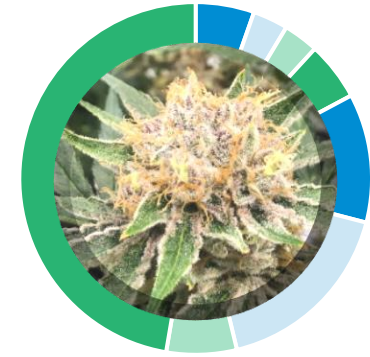

TERPENE KEY

STRAIN	d-Limonene	beta-Caryophyllene	beta-Pinene	alpha-Pinene	Linalool	alpha-Humulene	Camphene	alpha-Terpinene	gamma-Terpinene	Terpinolene	Ocimene	Delta-3-Carene	Guaiol	beta-Myrcene

Introducing the new...

FSC Terpene Description

Please observe the terpene details below, as they are essential to understanding how the natural compounds **impact your body's** functionality and recovery.

TERPENE DESCRIPTION

d-Limonene	Anti-inflammatory, antibacterial, antifungal, aids in digestion, reduces acid reflux, stress-reliever, may aid in weight loss
beta-Caryophyllene	Anti-inflammatory, antimicrobial, antibacterial, analgesic (pain-reliever), anti-anxiety, antidepressant, neurogenerative
beta-Pinene	Bronchodilator, anti-inflammatory, antibacterial, antioxidant, analgesic (pain-reliever), neurogenerative
alpha-Pinene	Bronchodilator, anti-inflammatory, broad spectrum antibiotic, anti-anxiety, stimulant, enhances memory retention
Linalool	Anti-anxiety, stress-reliever, analgesic (pain-reliever), anticonvulsant, antidepressant, muscle relaxant, sedative
alpha-Humulene	Appetite suppressant, analgesic (pain-reliever), antibacterial, anti-inflammatory, antifungal, insecticide, antiproliferative (aids in inhibiting tumor and cancerous cell growth)
Camphene	Anti-inflammatory, antibacterial, antiviral, antifungal, antioxidant, expectorant, antiseptic, anti-edematous, decreases lipid peroxidation (free radical reactions resulting in deterioration of the polyunsaturated lipids, also known as fats)
alpha-Terpinene	Antibacterial, antifungal, sedative, antioxidant, antiproliferative (aids in inhibiting tumor and cancerous cell growth)
gamma-Terpinene	Anti-inflammatory, antioxidant, antibacterial, antifungal, sedative, antiproliferative (aids in inhibiting tumor and cancerous cell growth)
Terpinolene	Antifungal, antibacterial, sedative, antioxidant, antiproliferative (aids in inhibiting tumor and cancerous cell growth)
Ocimene	Antiviral, antifungal, antiseptic, anti-inflammatory, decongestant, antibacterial
Delta-3-Carene	Anti-inflammatory, bone-repairing, antihistamine, insecticide, promotes mental focus and concentration
Guaiol	Anti-parasitic, analgesic (pain-reliever) antioxidant, antimicrobial, anti-inflammatory
beta-Myrcene	Sedative, analgesic (pain-reliever), anti-inflammatory, antimutagenic (reduces the increased toxicity and mutagenic effects resulting from chemotherapy. Reduces the establishment of sister chromatid exchange, a prospective harbinger of cancer).
